GREEN ENERGY TRAINING

A shared challenge for Further Education and industry

Moving from strategic need to visible demand, confident delivery and sustainable provision

David Wilkins
Assistant Principal – Infrastructure Industries
Oaklands College

The delivery challenge is an ecosystem challenge

Strategic need is clear. Sustainable delivery depends on several conditions developing together.

QUESTION FOR THE ROOM **Which part of this ecosystem could you strengthen: expertise, demand, curriculum or investment evidence?**

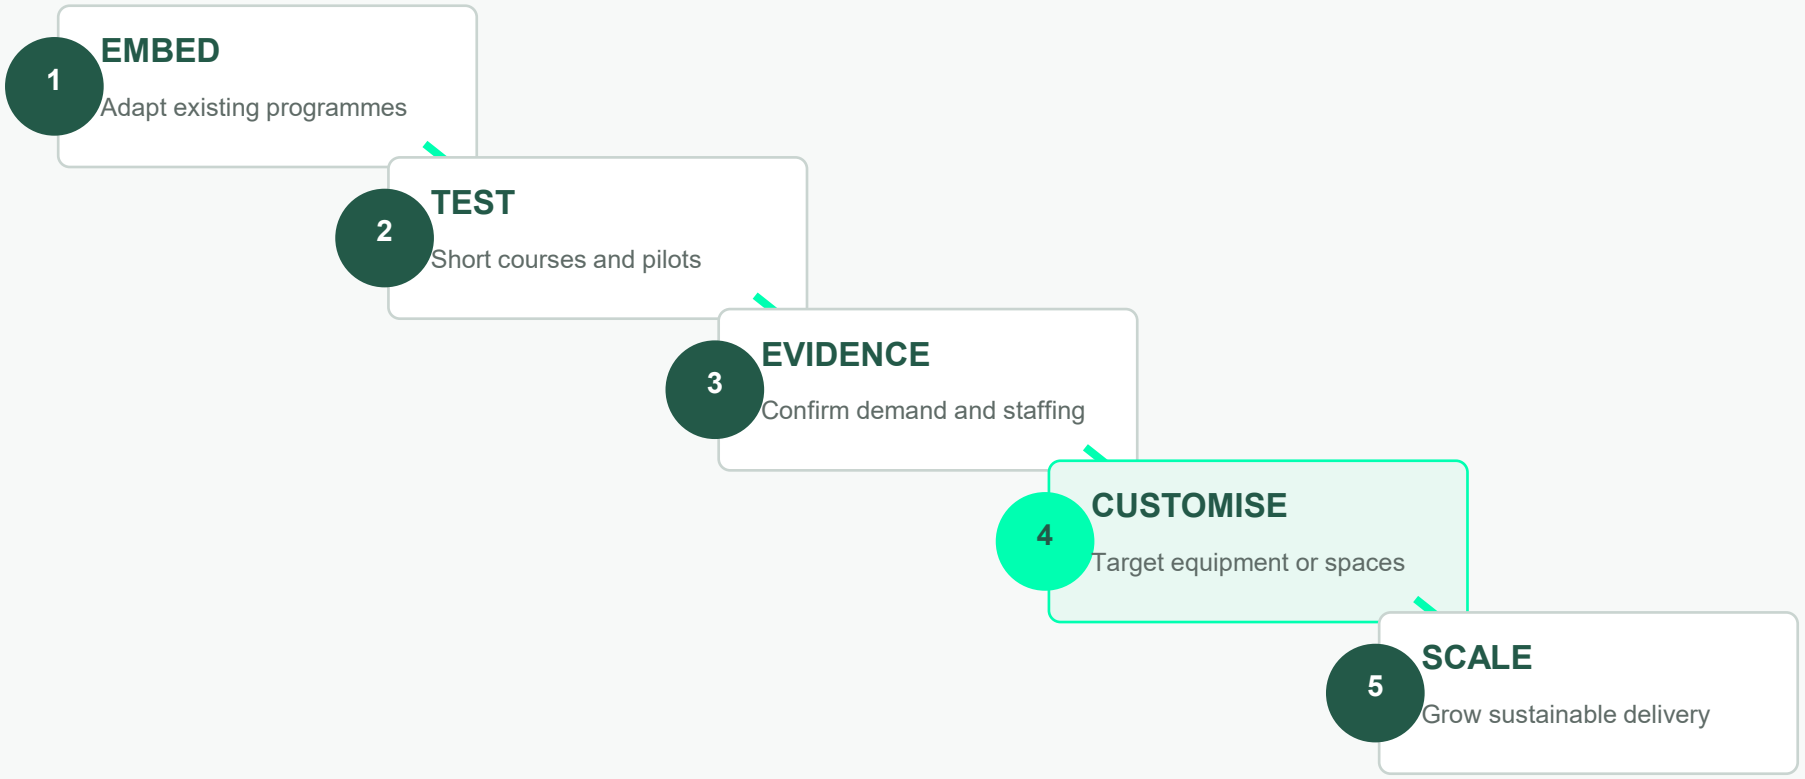

Oaklands: build from strength, then customise selectively

The opportunity is to develop the offer without treating green energy as a completely separate curriculum area.

EXISTING FOUNDATION

- Electrical
- Plumbing
- Construction
- Workshops and classrooms
- Employer-facing Industry Boards

Use what already exists

Investment follows evidence, not fashion.

QUESTION FOR THE ROOM **What demand, technology insight or pilot opportunity could you bring into this journey?**

Build the market while building the curriculum

Learner awareness, workplace access and lecturer currency must develop alongside the course offer.

1	MAKE CAREERS VISIBLE	**Targeted work experience for current learners.**	School demonstrations delivered with manufacturers.
2	OPEN THE WORKPLACE	**Employers provide meaningful work-experience opportunities.**	Industry contributes real projects and current practice.
3	REFRESH TEACHING	**Use CTEC's FE Teacher Industry Exchange.**	Lecturer placements, technical CPD and manufacturer training.

These actions build the learner pipeline, employer confidence and staff capability at the same time.

QUESTION FOR THE ROOM **Could you offer a placement, demonstration, live brief, technical update or lecturer exchange?**

BUILD TOGETHER, NOT IN ISOLATION

The staffing and customer challenge is shared across FE. Collaboration can reduce duplication and increase reach.

A PRACTICAL COLLABORATION OFFER

Placements • demonstrations • technical CPD • shared expertise • progression and referral

1

COLLEGES & ITPs

Share specialist expertise, delivery approaches and referral routes.

2

EMPLOYERS & MANUFACTURERS

Provide workplace access, technology insight and industry-led delivery.

3

SCHOOLS & LEARNERS

Create earlier awareness and a stronger pipeline into training.

Success is provision that employers need, learners can see themselves entering, and staff can deliver with confidence.

QUESTION FOR THE ROOM **What one commitment could your organisation make to FE after today?**
